

## Yellow protective foil 0.5mm 2 x 50m TYPE 200

Brand	MASTERNET
Manufacturer	
Country of manufacture	Poland
Weight	5.50 kg
Product Code	S_050
SKU	001271
Application	for protection during finishing works, renders and periodically stored materials
IBB ID	11117

### Product specification

Manufacturer	MASTERPLAST	Unit	roll
Brand	masternet	Colour	yellow
Country of manufacture	Poland		

Polyethylene film [PE] - Yellow protection foil 0.5mm 2 x 50m TYPE 200

#### Application area:

Yellow protective foils are mainly used to insulate each layer of the screed against moisture.

Yellow foils are used in vapor-tight insulation in the skeleton structure of walls, roofs and ceilings, in the implementation of covers and insulation of various materials against moisture, wind, dirt, dust, snow, etc.

They are also used to protect roof slopes, facades and window frames during finishing works and periodic protection of temporarily stored construction materials both on the construction site and during transport.
