SKU	001272
IBB ID	11118

Product specification

Manufacturer	MASTERPLAST	Unit	roll
Colour	yellow	Dimension	thickness: 0.20mm +/- 50%
Country of manufacture	Poland		

Protection foil yellow 0.20mm 2 x 50m polyethylene film [PE]

Application area:

The film is intended for vapor barrier insulation of structures, roofs, walls, ceilings and protection foil.

It is a necessary protection of the roof against moisture. Its role is to block water vapor pressing on thermal insulation from inside the rooms.

It is characterized by high vapor tightness, strength and resistance to cracks.

Together with mineral wool and a vapor-permeable membrane, it creates a tight roof system. In addition, the foil can be an excellent anti-moisture layer under floors, screeds, etc.

Thickness **0.2mm +/- 50%**

Resistance to water penetration W1

Reaction to fire class F
