

Repair mortar for brick and stone ATLAS CG 02 base 25kg

Brand	ATLAS
Manufacturer	
Weight	25.00 kg
Product Code	AT-CG-02-000-25
EAN	5905400560022
SKU	001276
Application	Highly elastic, reinforced with fibres
IBB ID	11122

Product specification

Manufacturer	ATLAS	Unit	bag
Brand	atlas	EAN	5905400560022
Coverage	ca. 1.6 kg/dm3	Relative air humidity during application and curing	< 80%
Density of the finished product	ca 1.9 g/cm3	pH	8

ATLAS CG-02 mortar for repairs of brick and stone

Most important features

- highly elastic
- reinforced with fibres
- for interior and exterior use
- water repellent
- stain resistant
- wide range of colours

Product description

ATLAS CG-02 is a manufactured on site dry mix on a basis of highest quality mineral binders, additives, modifying agents, trass and quartz fillers.

Perfect for mineral substrates such as brick and stone.

Optimal aggregate composition ensuring perfect application parameters – after appropriate treatment it is possible to restore original look of surface.

Possibility of modifying aggregate composition – addition of larger aggregate allows to obtain structure similar to the original element. Natural colour of timeworn white enables to stain product with powdered mineral pigments.

Perfectly matches historical mortars in objects under renovation work.
