Product specification

Manufacturer	STONE MASTER	Unit	pack
EAN	5905674242211		

The adhesive - available in the form of a thick, ready-to-use paste - is manufactured on the basis of synthetic resin with mineral fillers and admixtures improving performance properties.

It is characterized by high adhesion and flexibility. For gluing ceramic, plaster and concrete tiles on construction substrates such as: concrete, gypsum, cement and lime plasters, plasterboards, chipboard and osb as well as cement and anhydrite screeds. Work should be carried out at a temperature of 5°–25°C. Consumption - from 0.8 to 1.5 kg/m².

Detailed information on handling the product is provided on the packaging label. Available in 7 kg buckets.
