Rockmin is a light stone wool with very high thermal parameters.

The ROCKWOOL brand product is recommended mainly for insulation work. Wool is perfect for, among others: when insulating attics, ceilings and suspended ceilings. Rockmin has the highest non-flammability class - A1. The wool is light and has a lower density than standard insulation wool. An additional advantage of the product are high acoustic parameters - the insulated room is well insulated against noise. The presented wool board model has dimensions of 1000 x 610 mm and a thickness of 50 mm. The product is available in several dimensions.
