Only the best materials, the quality of which has been confirmed by laboratory tests

Mounting screws in the color of the finish

2 mm stainless steel

Dedicated cleaning agent, safe for cleaned surfaces

Production with minimum waste - in line with the "Less Waste" concept

At Deante, we are aware of the threats facing the natural environment and the dwindling resources of the planet. That is why we produce bathroom accessories in accordance with the idea of Less Waste. This means that we use available materials as much as possible. As a result, waste is reduced to the absolute minimum.

Mounting screws in the color of the finish

Screws for mounting accessories are in the color of the finish, which ensures the aesthetics and elegance of the product. Thanks to this, Mokko accessories are not only a practical addition, but also a real decoration of the room.

2 mm stainless steel

Accessories are made of high-class 2 mm stainless steel. Despite the low thickness, steel is characterized by high resistance and strength.

Dedicated cleaning agent, safe for cleaned surfaces

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for for a long time, facilitating daily cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be extremely easy!
