The tap is equipped with an aerator, thanks to which the water stream is perfectly aerated and soft. This solution improves the comfort of use, while limiting water consumption, which translates into lower utility bills. You are also contributing to taking care of our planet.

The handle located on the side ensures that the tap is kept clean during everyday use. There are fewer stains and lime sediment on the tap. It is also a good solution for low-suspended cabinets, shelves or mirrors.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for a long time, facilitating daily cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be extremely easy!
