The tap is equipped with an aerator, thanks to which the water stream is perfectly aerated and soft. This solution improves the comfort of use, while limiting water consumption, which translates into lower utility bills. You are also contributing to taking care of our planet.

The flow class with means that within a minute the tap flows between 4 and 9 liters of water. The stream is also comfortable to use, delicate and soft. This solution is ideal wherever you pay attention to ecological and economic responsibility - which also means your home!

Backflow valves guarantee the correct operation of the fittings, and in thermostatic taps they also prevent water mixing in the pipes.

Anti-Twist is a system that prevents the end of the shower hose from twisting during its use, which significantly affects the comfort of showering. Forget about the need to constantly undo it and losing time. What's more, the Anti-Twist system increases the durability and reliability of the product.

"Coin Slot" Aerator can be unscrewed even with a coin. This is very useful when we want to clean it or replace it with a new one.

In the Alpinia series, the attention is drawn to the shapes with soft lines and the rounded body. The rounded shape makes the water flow freely from the perfectly smooth surface, and the products are easier to clean. Their simple, economical form will appeal to supporters of modern interiors, who appreciate functionality and refined details. Thanks to its small dimensions, Alpinia is an ideal solution for small rooms.
