The tap is equipped with an aerator, thanks to which the water stream is perfectly aerated and soft. This solution improves the comfort of use, while limiting water consumption, which translates into lower utility bills. You are also contributing to taking care of our planet.

Backflow valves guarantee the correct operation of the fittings, and in thermostatic taps they also prevent water mixing in the pipes.

The handle located on the side ensures that the tap is kept clean during everyday use. There are fewer stains and lime sediment on the tap. It is also a good solution for low-suspended cabinets, shelves or mirrors.
