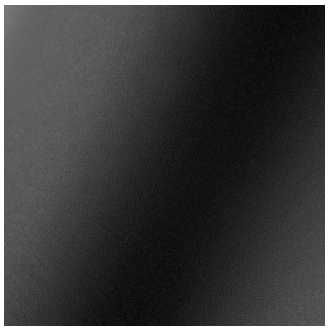
The mixer body is made of the highest quality brass

3-function shower switch, able to lock to 2 functions

Innovative, durable and easy to clean Nero coating

The black, matte surface of Deante Nero fittings is the result of the use of innovative technology. Its special properties mean that there are no fingerprints on the tap. The surface structure is durable and easy to clean. To remove any dirt, just wipe the tap with a soft cloth. What's more, arranging the interior using a deep black fittings makes the colors surrounding it brighter, fuller and more expressive.



Flush-mounted installation ensures the aesthetics of the bathroom

The main advantages of concealed mounting are aesthetic appearance, ease of keeping the bathroom clean and hiding installation components, which are also not exposed to mechanical damage. Solutions of this type will also work in small bathrooms, where every centimeter counts. When installing a concealed system, only decorative wall-mounted elements remain visible, and the bathroom is functional, effective and fits in a fashionable minimalist style.

Anti-twist system, preventing the hose from twisting

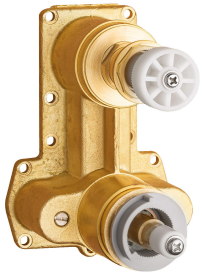
Anti-Twist is a system that prevents the end of the shower hose from twisting during its use, which significantly affects the comfort of showering. Forget about the need to constantly undo it and losing time. What's more, the Anti-Twist system increases the durability and reliability of the product.

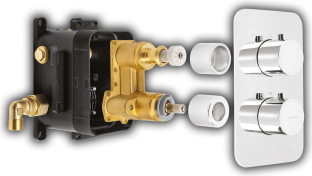
Convenient installation - you can install the BOX now and choose external elements at any time

You gain access to the internal mechanism of Box, even after the installation is complete. The lockable casing protects the mixer mechanism during construction works.

The best materials guarantee durability and reliability of the product

All elements are made of high-quality materials: brass with the best properties and high-quality plastic.





Timelessness and unlimited creative possibilities

The universal construction of the BOX allows you to replace the classic mixer tap with a thermostatic one at any time and vice versa. In the future, you can easily change the arrangement by replacing external elements.

Complementarity and comprehensiveness of the offer

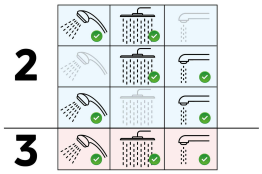
You can easily match bathroom faucets from the same series and complementary products to the external components of the BOX - rosettes and levers.

Modern design with a hint of timelessness

Hiacynt is an original collection designed with attention to detail. The author of the series, Małgorzata Płoskońska, managed to combine modern design with a hint of timelessness. Hiacynt mixers are like elegant and subtle jewelry for the home, whose shapes will add splendor to bathroom interiors. The series is characterized by a dynamic form - soaring arches balanced with straight planes.

Dedicated cleaning agent, safe for cleaned surfaces

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!



3-function shower switch, able to lock to 2 functions

Three water outlets can be connected to the concealed mixer BOX: a hand shower, a shower head and a spout. But it is also possible to block one function and then you can connect as you wish: a hand shower and a shower head, or a shower head and a spout, or a hand shower and a spout. One BOX ? several possibilities.
