The biggest advantage of Deante toilet seats is the quiet and soft closing mechanism. Thanks to this, you prevent damage to sanitary ceramics, but also the seat itself.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for a long time, facilitating another cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!
