Tempered glass has a harder surface and is more resistant to scratches, impacts and sudden temperature changes - in accordance with the European standard PN-EN. In addition, it is safe glass, (which is certified) by the Certificate from the Institute of Glass and Ceramics.

The covers hide the unsightly assembly parts, adding elegance to the cabins.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for for a long time, facilitating another cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!

The profile system makes it possible to level the curvature of the walls and helps to adjust the cabin to the place of installation.
