| SKU | 002122 |
| IBB ID | 11621 |

Product specification

| | | | |
|------------------------------|---------------|----------------------------|-------------------|
| Manufacturer | DEANTE | Unit | pcs |
| EAN | 5908212081327 | Additional characteristics | cool-out |
| Frame height adjustment [mm] | 200 | Aerator size | M28 |
| | | Aerator type | coin-slot |
| Ceramic cartridge size | 35 mm | Adjustment range from [mm] | 700 |
| Connection thread | tak | Flow class [l/min] | b - 20-24.9 l/min |
| Material | 304 steel | Diameter [mm] | 225 |
| Connection diameter | 50 | Shape | other |
| Thickness [mm] | 81 | | |

The innovative Anti-Calc system extends the life of the product, guarantees reliability of operation and significantly facilitates cleaning. Limescale deposits accumulating at a water outlet is a completely normal thing, the result of which is decreased aesthetics after some time. To restore the original appearance, you usually need persistent scrubbing and special detergents. Thanks to Anti-Calc silicone nozzles, you can say goodbye to tedious cleaning. Limescale is very easy to remove during a daily bath or shower. Just wipe gently with a sponge or simply with your fingers, and the handset will look as new. Individual nozzles are replaceable, and in the set you will always find a few spare pieces. We recommend systematic removal of sediment from the nozzles.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be extremely easy!
