| SKU | 002123 |
| IBB ID | 11622 |

Product specification

| | | | |
|------------------------------|-------------------|----------------------------|-------------|
| Manufacturer | DEANTE | Unit | pcs |
| EAN | 5908212074664 | Additional characteristics | cool-out |
| Frame height adjustment [mm] | 200 | Aerator size | M28 |
| | | Aerator type | coin-slot |
| Ceramic cartridge size | 35 mm | Adjustment range from [mm] | 700 |
| Connection thread | tak | Finish | steel |
| Flow class [l/min] | s - 15-19.9 l/min | Material | 304 steel |
| Connection diameter | 50 | Shape | rectangular |
| Flush mounting | YES | Thickness [mm] | 9 |

The main advantages of concealed mounting are aesthetic appearance, ease of keeping the bathroom clean and hiding installation components, which are also not exposed to mechanical damage. Solutions of this type will also work in small bathrooms, where every centimeter counts. When installing a concealed system, only decorative wall-mounted elements remain visible, and the bathroom is functional, effective and fits in a fashionable minimalist style.

The innovative Anti-Calc system extends the life of the product, guarantees reliability of operation and significantly facilitates cleaning. Limescale deposits accumulating at a water outlet is a completely normal thing, the result of which is decreased aesthetics after some time. To restore the original appearance, you usually need persistent scrubbing and special detergents. Thanks to Anti-Calc silicone nozzles, you can say goodbye to tedious cleaning. Limescale is very easy to remove during a daily bath or shower. Just wipe gently with a sponge or simply with your fingers, and the handset will look as new. Individual nozzles are replaceable, and in the set you will always find a few spare pieces. We recommend systematic removal of sediment from the nozzles.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for for a long time, facilitating another cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!
