The Agawa line designed by Maria Warenik is a combination of aesthetics with functionality and ergonomics. Elegant, minimalist, and at the same time solid and long-lived in use. Precisely shaped surfaces and edges are pleasant to the touch. Fittings without nooks and crannies are easy to keep clean. The timeless chrome finish of the Agawa line makes it a perfect solution for any bathroom.

A large, comfortable shower head can be successfully used interchangeably with a rain shower. Its advantage is the ability to direct the water stream at any height. In this way, a child and an adult can easily take a bath. You can take a shower without any problems, even if you don't want to get your hair wet.

Depending on your wishes, you can choose from three types of stream: rain, mixed and hydromassage, which is changed with a discreet and ergonomic switch. Daily use of water will become a special ritual.

Silicone tabs prevent limescale build-up and thus extend the durability and reliability of the shower head. Just wipe them with your finger and scale deposits disappear in the blink of an eye.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be extremely easy!
