

# Hand shower, 1-function Hiacynt

Manufacturer	
Weight	0.15 kg
Product Code	NQH_A51S
EAN	5908212088395
SKU	002245
IBB ID	12475

## Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5908212088395	Additional characteristics	cool-out
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	tak	Flow class [l/min]	z - 7.2-11.9 l/min
Material	ABS	Connection diameter	50
Shape	rectangular		

Silicone tabs prevent limescale build-up and thus extend the durability and reliability of the shower head. Just wipe them with your finger and scale deposits disappear in the blink of an eye.

The white, matte surface of Deante Bianco fittings is the result of the use of innovative technology. Fingerprints do not remain on a subtle, matte finish, so it is easy to keep clean. To remove any sediments just wipe the tap coating with a soft cloth. A bright, elegant fittings in a shade of timeless, classic white will be perfect in Scandinavian or shabby chic arrangements.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!

Hiacynt is an original collection designed with attention to detail. The author of the series, Małgorzata Płoskońska, managed to combine modern design with a hint of timelessness. Hiacynt mixers are like elegant and subtle jewelry for the home, whose shapes will add splendor to bathroom interiors. The series is characterized by a dynamic form - soaring arches balanced with straight planes.

The innovative Anti-Calc system extends the life of the product, guarantees reliability of operation and significantly facilitates cleaning. Limescale deposits accumulating at a water outlet is a completely normal thing, the result of which is decreased aesthetics after some time. To restore the original appearance, you usually need persistent scrubbing and special detergents. Thanks to Anti-Calc silicone nozzles, you can say goodbye to tedious cleaning. Limescale is very easy to remove during a daily bath or shower. Just wipe gently with a sponge or simply with your fingers, and the handset will look as new. Individual nozzles are replaceable, and in the set you will always find a few spare pieces. We recommend systematic removal of sediment from the nozzles.
