The sink made of steel is resistant to impact, high temperatures up to 250 degrees Celsius and thermal shock. Stainless steel intended for the production of sinks consists of 18% chrome, which responsible high chemical strength and 10% nickel, which at the same time flexibility. Such a combination results in a pretty, aesthetic and constant color. Stainless steel is simple to clean, repels bacteria from the surface. The antiseptic coating guarantees a high level of hygiene and is easy to clean.

Factory drilled holes in the sink have many advantages. First they allow selection of the right or left side, where we will have the drainer, therefore the sink is universal. Assembly is easy and relieves you of the need troublesome drilling holes by yourself. washer or pop-up plug| pop-up plug or dishwashing liquid dispenser}.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!

The sink was equipped with ingenious "Space Saver" siphon. If you've been|annoyed|annoyed by} elbows and pipes taking up all the space in your cabinet, this is the solution for your kitchen. Special and telescopic design allows you to adjust position of the siphon to your needs. Thanks to this, it is simple to find much more space that can be used for homemade preserves or garbage. It is also possible to connect a washing machine or dishwasher to the siphon. And most importantly - you get the siphon in set!
