The sink of stainless steel is resistant to temperatures up to 250 degrees Celsius, thermal shock and impacts to thermal shock and high temperatures up to 250 degrees Celsius and impact. Stainless steel intended for the production of sinks contains 18% chrome, which provides high chemical resistance and 10% nickel, which additionally flexibility. Such a combination results in a pretty, elegant and durable color. Stainless steel is easy to clean, repels bacteria from the surface. The antiseptic coating guarantees a high level of hygiene and is easy to clean.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for for a long time, facilitating daily cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!
