

Granite sink, 1-bowl Andante

Manufacturer	
Weight	11.60 kg
Product Code	ZQN_A103
EAN	5908212073728
SKU	002431
IBB ID	11995

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5908212073728	Additional characteristics	cool-out
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Finish	steel
Flow class [l/min]	z - 4-9 l/min	Material	granite
Depth [mm]	197	Installation method	recessed
Plug type	automatic	Height [mm]	210
Connection diameter	50	Cutout in the countertop (recessed) - length [mm]	580
Cut out width recessed	500	Dishwasher possibility	YES
Surface type	matt	Drain diameter	3.5"
Number of sink compartments	1		

Granite composite is a combination of quartz sand and resins in ideal proportions. This is the reason why our sinks are resistant not only to impact, but also to high temperature (250°C), spot color change and thermal shock - in accordance with the European standard PN-EN 13310. They do not absorb odors and thanks to their hydrophobic properties they repel water molecules. Granite is chic and always fashionable, and thanks to the richness of colors fits every kitchen - modern and traditional. Deante granite sinks created in Poland, in one of the most modern factories in Europe. Advanced production technology guarantees preservation of the highest standards of workmanship and audit quality, which results in not only great appearance of the product, but also its special properties.

The automatic drain plug system allows you to adjust the water outflow with a knob. There is only one discreet controller on top of the sink. An important advantage of this technology is the fact that one move is enough to immediately unlock the water outflow, without the need to soak

your hands.

Hydrophobicity is one of the natural properties of granite, very useful in the kitchen. The surface of the sink repels particles of water, what the drops without flow taking dirt particles with them. All of this makes sink cleaning much easier and no requires scrubbing or use of specialized chemicals.

Modern sinks are part of the fashion of using the kitchen space to the maximum. With the same dimensions, they allow you to fit more in their interior. Cooking enthusiasts are certainly pleased by the fact that their very deep and roomy bowls will without effort allow to wash not only large pots, but even sheets removed from the oven or shelves from the fridge! More space makes it easier to rotate the dishes and is useful for less standard applications.

Apart from the standard hole for the tap, the sink has special partly-drilled holes. They do not have to be used, but if you would like to install a dishwashing liquid dispenser or an automatic plug, they will allow to tailor the product to your preferences. All you need to do in order to drill a hole out on the bottom side is to deepen the already prepared cut with a hole saw.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for for a long time, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be extremely easy!

The sink is equipped with innovative "Space Saver" siphon. If you've been|annoyed|annoyed by} pipes and elbows taking up all the space in your cabinet, this is the solution for your kitchen. Telescopic and special design allows you to adjust shape of the siphon to your needs. Thanks to this, it is simple to find much more space that can be used for homemade preserves or bins for waste segregation. You can also connect a dishwasher or washing machine to the siphon. And most importantly - you get the siphon in kit!
