

Granite sink with tap, 1.5-bowl with drainer Zorba

Manufacturer	
Weight	17.19 kg
Product Code	ZQZA2513
EAN	5908212058770
SKU	002508
IBB ID	12555

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5908212058770	Additional characteristics	cool-out
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Finish	steel
Flow class [l/min]	z - 4-9 l/min	Material	granite
Depth [mm]	150	Installation method	recessed
Plug type	automatic	Height [mm]	164
Connection diameter	50	Cutout in the countertop (recessed) - length [mm]	740
Cut out width recessed	420	Surface type	matt
Drain diameter	3.5"	Recessed depth [mm]	124
Number of sink compartments	1.5		

Granite composite is a combination of quartz sand and resins in ideal proportions. Thanks to this our sinks are resistant not only to impact, but also to high temperature (250°C), discoloration and thermal shock - in accordance with the European standard PN-EN 13310. They do not absorb odors and have hydrophobic properties that repel water molecules. Granite is chic and timeless, and thanks to the richness of colors fits every kitchen - futuristic and traditional. Deante granite sinks created in Poland, in one of the most modern factories in Europe. Progressive production technology guarantees preservation of the highest standards of workmanship and control quality, which results in not only great appearance of the product, but also its special properties.

The automatic drain plug system allows you to adjust the water outflow with a knob. There is only one discreet controller on top of the sink. An important advantage of this technology is the fact that one move is enough to immediately unlock the water outflow, without the need to soak

your hands.

Hydrophobicity is one of the natural properties of granite, very expected in the kitchen. The surface of the sink repels particles of water, what the drops freely flow taking dirt particles with them. All of this makes keeping clean much easier and no requires scrubbing or use of specialized chemicals.

The small bowl is an innovative solution for small kitchens. It does not require additional space, and significantly improves the convenience of using a wet part of the countertop. It works great for washing fruit and vegetables, as well as cutlery. It also has the option of connecting a grinder, without wasting space under the main bowl. But it's not over yet! It works very well when you have to wash the fragile porcelain separately so as not to break it. We also do not advise you to put freshly sharpened knives in a sink with other dishes. Moreover, a small bowl is the most convenient place to defrost foodstuffs.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for for a long time, facilitating another cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!

The tap is equipped with an aerator, thanks to which the water stream is perfectly aerated and soft. This solution improves the comfort of use, while limiting water consumption, which translates into lower utility bills. You are also contributing to taking care of our planet.

The sink is equipped with modern "Space Saver" siphon. If you've been|annoyed|annoyed by} pipes and elbows taking up most of the space in your cabinet, this is the solution for your kitchen. Telescopic and special design allows you to adjust shape of the siphon to your needs. Thanks to this, it is easy to find much more space that can be used for homemade preserves or bins for waste segregation. It is also possible to connect a washing machine or dishwasher to the siphon. And most importantly - you get the siphon in kit!

Factory prepared holes in the sink have several advantages. First they allow any choice of the side on which we will have the drainer, therefore the sink is "reversible". Assembly is simple and relieves you of the need troublesome drilling holes by yourself. washer or pop-up plug| pop-up plug or dishwashing liquid dispenser}.
