

Granite sink with tap, 1-bowl with drainer Zorba

Manufacturer	
Weight	15.79 kg
Product Code	ZQZV7113
EAN	5908212048573
SKU	002515
IBB ID	12661

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5908212048573	Additional characteristics	cool-out
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Finish	steel
Flow class [l/min]	z - 4-9 l/min	Material	granite
Depth [mm]	150	Installation method	recessed
Plug type	automatic	Height [mm]	160
Connection diameter	50	Cutout in the countertop (recessed) - length [mm]	740
Cut out width recessed	420	Dishwasher possibility	YES
Surface type	matt	Drain diameter	3.5"
Number of sink compartments	1		

Granite composite is a combination of quartz sand and resins in ideal proportions. Thanks to this our sinks are resistant not only to impact, but also to high temperature (250°C), discoloration and thermal shock - in accordance with the European standard PN-EN 13310 They do not take odors and have hydrophobic properties that repel water molecules. Granite is elegant and timeless, and thanks to the a wide range of colors goes well with equipment every kitchen - futuristic and traditional . Deante granite sinks are produced in Poland, in one of the most developed factories in Europe. Progressive production technology guarantees preservation of the highest standards of workmanship and control quality, which results in not only beautiful appearance of the product, but also its unique properties.

The automatic drain plug system allows you to adjust the water outflow with a knob. There is only one discreet controller on top of the sink. An important advantage of this technology is the fact that one move is enough to immediately unlock the water outflow, without the need to soak

your hands.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!

The tap is equipped with an aerator, thanks to which the water stream is perfectly aerated and soft. This solution improves the comfort of use, while limiting water consumption, which translates into lower utility bills. You are also contributing to taking care of our planet.

The sink was equipped with modern "Space Saver" siphon. If you've been annoyed by pipes and elbows taking up most of the space in your cabinet, this is the solution for you. Special and telescopic design allows you to adjust shape of the siphon to your needs. Thanks to this, it is easy to find much more space in the cabinet for example for homemade preserves or garbage. It is also possible to connect a washing machine or dishwasher to the siphon. And most importantly - you get the siphon in kit!

Hydrophobicity is one of the natural features of granite, very expected in the kitchen. The surface of the sink repels particles of water, therefore the drops freely flow taking dirt particles with them. All of this makes keeping clean much simpler and no scrubbing or use of specialized chemicals.

Factory drilled holes in the sink have several advantages. First of all they allow selection of the right or left side, where we will have the drainer, therefore the sink is "reversible". Assembly is simple and relieves you of the necessity of troublesome drilling holes by yourself. washer or pop-up plug | pop-up plug or dishwashing liquid dispenser }.
