

Granite sink, 1-bowl Solis

Manufacturer	
Weight	10.65 kg
Product Code	ZRS_G803
EAN	5908212096437
SKU	002523
IBB ID	12669

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5908212096437	Additional characteristics	cool-out
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Finish	steel
Flow class [l/min]	z - 4-9 l/min	Material	granite
Depth [mm]	180	Diameter [mm]	480
Installation method	recessed	Plug type	manual
Height [mm]	194	Connection diameter	50
Cut out diameter recessed	460	Dishwasher possibility	YES
Surface type	matt	Drain diameter	3.5"
Number of sink compartments	1		

Granite composite is a combination of quartz sand and resins in measured strictly proportions. Thanks to this our sinks are resistant not only to impact, but also to high temperature (250°C), discoloration and thermal shock - in accordance with the European standard PN-EN 13310 They do not absorb odors and have hydrophobic properties that repel water molecules. Granite is chic and timeless, and thanks to the a wide range of colors fits every kitchen - futuristic and classical . Deante granite sinks are produced in Poland, in one of the most modern factories in Europe. Progressive production technology enables of the highest standards of workmanship and control quality, which results in not only beautiful appearance of the product, but also its special properties.

Hydrophobicity is one of the natural properties of granite, very useful in the kitchen. The surface of the sink repels drops of water, what the drops without drift taking dirt particles with them. All of this makes keeping clean much simpler and no requires scrubbing or use of specialized chemicals.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for for a long time, facilitating another cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!

The sink is equipped with innovative "Space Saver" siphon. If you've been|annoyed|annoyed by} elbows and pipes taking up most of the space in your cabinet, this is the solution for you. Telescopic and special design allows you to adjust position of the siphon to your needs. Thanks to this, it is easy to find much more spacein the cabinet for example for homemade preserves or bins for waste segregation. It is also possible to connect a washing machine or dishwasher to the siphon. And most importantly - you get the siphon in set!

The antiseptic surface created by Deante was created using advanced nanopartite technology using the highest purity silver ions. The solution of this metal is added at the production stage to the mass from which sinks are formed later. As a result, it is evenly mixed throughout the product, allowing to achieve durability and efficiency that significantly exceeds the parameters of using only the top coating.
