Flow class [l/min]	z - 4-9 l/min	Material	304 steel
Depth [mm]	220	Installation method	recessed, hanging/wall-mounted
Plug type	manual	Height [mm]	220
Connection diameter	50	Cutout in the countertop (recessed) - length [mm]	513
Cut out width recessed	413	Dishwasher possibility	YES
Surface type	sat. polished	Drain diameter	2"
Number of sink compartments	1	Steel thickness [mm]	1

Single-bowl utility sink - recessed or wall-mounted

The utility sink is made of the highest quality materials.

This makes it resistant to impacts, temperature changes and contact with chemical agents.

It does not lose its properties even in unheated rooms.

Ergonomic shape makes it easy to use and clean.

A neat, 1-bowl sink is a perfect solution for small kitchens and studios with a kitchenette.

The product can be mounted directly to the wall, does not require an additional frame, or embedded in the countertop.

- Stainless steel has high anti-corrosion properties. It is resistant to very high and low temperatures and resistant to food acids. Thanks to its plasticity, it is widely used both at home and in industry.
- The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for for a long time, facilitating daily cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be extremely easy!
