Discreet and at the same time a very ergonomic function switch that allows you to change the flow of the water stream even at low pressure.

Backflow valves guarantee the correct operation of the fittings, and in thermostatic taps they also prevent water mixing in the pipes.

Silicone tabs prevent limescale build-up and thus extend the durability and reliability of the shower head. Just wipe them with your finger and scale deposits disappear in the blink of an eye.

The black, matte surface of Deante Nero fittings is the result of the use of innovative technology. Its special properties mean that there are no fingerprints on the tap. The surface structure is durable and easy to clean. To remove any dirt, just wipe the tap with a soft cloth. What's more, arranging the interior using a deep black fittings makes the colors surrounding it brighter, fuller and more expressive.
