At Deante, we are aware of the threats facing the natural environment and the dwindling resources of the planet. That is why we produce bathroom accessories according with the idea of Less Waste. This means that we use available materials as much as possible. As a result, waste is reduced to the absolute minimum.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!
