

Mineral wool slab FRONTROCK PLUS 100mm 1.8m2

Brand	FRONTROCK PLUS
Manufacturer	
Weight	10.00 kg
EAN	5902565795245
SKU	000045
Advice IBB	
Application	FRONTROCK is an optimal solution for most buildings with façades insulated using ETICS technology
IBB ID	9170

Product specification

Manufacturer	ROCKWOOL	Unit	pack
Brand	frontrock plus	EAN	5902565795245
Thermal conductivity [W/mK]	0.035 W/m·K	Norm	EN 13162:2012+A1:2015

Mineral wool slab FRONTROCK PLUS 100mm 1.8m2

FRONTROCK PLUS non-flammable stone wool facade panels provide effective thermal, acoustic and fire insulation of external walls.

Thus, they improve the energy efficiency of the entire building.

By insulating the building with FRONTROCK PLUS façade panels from ROCKWOOL, we can be sure of the highest quality of the product and the resistance of thermal insulation.

To the boards mounted on the walls of the building, simply install a fiberglass reinforcing mesh and finish them with a plaster primer and plaster.

Application

FRONTROCK PLUS allows you to achieve comfort at home and guarantees a durable facade.

Thanks to the non-flammable stone wool, the boards have the highest fire resistance class - A1 and significantly improve the fire safety of the house.

Moreover, thanks to the excellent insulating parameters of the product, there is a pleasant temperature in your home, both in cold and in summer.

Rock wool does not change its characteristics during use, so you can enjoy the benefits of lower heating bills, lower smog emissions and greater fire safety for years.

FRONTROCK PLUS is an optimal solution for most buildings with façades insulated using ETICS technology.

Insulation of 0.035 W/mK provides excellent thermal protection of insulated buildings.

The lack of thermal shrinkage and the risk of thermal bridges on the façade, together with the durability of the material made of natural stone, ensures limited heat loss from the building throughout its use. The product is available in a wide range of thicknesses - from 50 mm to 300 mm - which makes it easier to select the optimal material.

Thanks to this proven solution with additional benefits resulting from the material itself, insulation performed by a professional contractor is a guarantee for the investor that the condition of his building will be excellent for many years, and for the contractor - a guarantee of peace of mind and the certainty that well-made stone wool insulation will guarantee him complaints, as well as good reputation and recommendation as a contractor.
