

## Shower wall / walk-in, Kerria Plus system - 120 cm

### Kerria Plus

|              |               |
|--------------|---------------|
| Manufacturer |               |
| Weight       | 40.10 kg      |
| Product Code | KTS_032P      |
| EAN          | 5907650810575 |
| SKU          | 002902        |
| IBB ID       | 11882         |

### Product specification

|                            |  |   |             |
|----------------------------|--|---|-------------|
| Manufacturer               | DEANTE   | Unit  | pcs         |
| EAN                        | 5907650810575  | Active cover layer                                | YES         |
| Additional characteristics | cool-out   | Frame height adjustment [mm]                      | 200         |
| Aerator size               | M28  | Aerator type                                      | coin-slot   |
| Ceramic cartridge size     | 35 mm  | Adjustment range from [mm]                        | 700         |
| Connection thread          | m8   | Adjustment range up to [mm]                       | 1200        |
| Flow class [l/min]         | z - 4-9 l/min  | Material  | ZnAl        |
| Installation method        | to be combined with kts shower doors. to be completed with walk-in kts. possibility of installation with a movable kts panel | Height [mm]                                       | 2000        |
| Railing length [mm]        | 1062   | Connection diameter                               | 50          |
|                            |  | Glass finish                                      | transparent |
|                            |  | Possibility of installation without a shower tray | Yes         |

## Shower wall / walk-in, Kerria Plus system - 120 cm

Only the best materials, the quality of which has been confirmed by laboratory tests

Possibility to install the cabin without a shower tray, directly on the tiles

Hydrophobic Active-Cover coating that makes it easier for water to run off the glass

Covering of assembly elements

Modern handles with glass protection

TOTALWHITE transparent glass

Profiles leveling the curvature of the walls

The railings give the structure rigidity

Dedicated cleaning agent, safe for cleaned surfaces

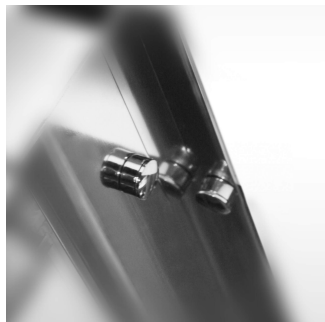

Dedicated to Active Cover surfaces

Safe and durable tempered glass

Resistance to impacts, chemicals and stains in accordance with PN-EN 14428+A1:2008 norm, confirmed by tests of the Institute of Ceramics and Building Materials

## Hydrophobic Active-Cover coating that makes it easier for water to run off the glass

The glass in the cabins has been covered with the innovative Active Cover hydrophobic coating, which repels water molecules from the glass surface and thus significantly reduces the formation of scale. The coating is applied during the production of glass, which guarantees its long durability and reliability.

### Covering of assembly elements

The covers hide the unsightly assembly elements, adding chic and elegance to the cabins.

## TOTALWHITE transparent glass

Crystal clear, safety tempered glass with low iron oxide content. It gives a feeling of refinement and perfectly exposes the fittings inside the cabin.

## Profiles leveling the curvature of the walls

The profile system makes it possible to level the curvature of the walls and helps to adjust the cabin to the place of installation.

## The railings give the structure rigidity

The purpose of the railings is to strengthen and stabilize the construction of shower cabins. They are elegantly finished and easy to keep clean.

## Dedicated cleaning agent, safe for cleaned surfaces

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!

## Safe and durable tempered glass

Tempered glass has a harder surface and is more resistant to scratches, impacts and sudden temperature changes - in accordance with the European standard PN-EN. In addition, it is safe glass, {which is certified}by the Certificate from the Institute of Glass and Ceramics.
