In the Alpinia series, the attention is drawn to the shapes with soft lines and the rounded body. The rounded shape makes the water flow freely from the perfectly smooth surface, and the products are easier to clean. Their simple, economical form will appeal to supporters of modern interiors, who appreciate functionality and refined details. Thanks to its small dimensions, Alpinia is an ideal solution for small rooms.

You gain access to the internal mechanism of Box, even after the installation is complete. The lockable casing protects the mixer mechanism during construction works.

All elements are made of high-quality materials: brass with the best properties and high-quality plastic.

The universal construction of the BOX allows you to replace the classic mixer tap with a thermostatic one at any time and vice versa. In the future, you can easily change the arrangement by replacing external elements.

You can easily match bathroom faucets from the same series and complementary products to the external components of the BOX - rosettes and levers.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!
