Anti-Twist is a system that prevents the end of the shower hose from twisting during its use, which significantly affects the comfort of showering. Forget about the need to constantly undo it and losing time. What's more, the Anti-Twist system increases the durability and reliability of the product.

The main advantages of concealed mounting are aesthetic appearance, ease of keeping the bathroom clean and hiding installation components, which are also not exposed to mechanical damage. Solutions of this type will also work in small bathrooms, where every centimeter counts. When installing a concealed system, only decorative wall-mounted elements remain visible, and the bathroom is functional, effective and fits in a fashionable minimalist style.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!

This perfect form is available in many finishes: classic chrome, majestic gold, noble black and intriguing deep gray - titanium.

Delicate, minimalist, and above all beautiful and intriguing - this is the Arnika line, inspired by the Danish hygge style. The Arnika series combines functionality and inspiration with gentle shapes found in nature.
