

Shower column, with bathtub mixer, thermostatic

Manufacturer	
Weight	6.40 kg
Product Code	NAC_N1HT
EAN	5907650815037
SKU	003066
IBB ID	13034

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5907650815037	Additional characteristics	cool-out
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Aerator	Yes	Ceramic cartridge size	35 mm
Adjustment range from [mm]	700	Connection thread	m8
Flow class [l/min]	a - 12-14.9 l/min	Material	304 steel
Connection diameter	50	Shape	square
High adjust	YES	Thickness [mm]	4.5

On the one hand, we have focused on advanced technology, economy and durability, while on the other hand, on good design. The faucets designed by Katarzyna Łogwinienko have a number of functions that enhance the comfort of bathing, making it an uninhibited relaxation.

Design can go hand in hand with comfort! The knobs of our thermostatic mixers combine beauty with ergonomics, allowing for comfortable and precise head control.

Check valves prevent water from retreating to the installation. Additional strengthening even more effectively protects the cartridge and the entire tap from damage.

The movable, folding spout also functions as a shower switch. To fill the bath, the spout must be positioned perpendicular to the mixer. The folding spout ensures safer bathing, which is particularly important for small children.

The silicone aerator allows for easy removal of lime sediment - simply wipe your finger across its silicone edges. The movable design allows you to change the angle of the water flow.

The mixer has a 38°C lock, which prevents accidentally increasing temperature, providing a maximum comfortable use. In addition, in the Cascada model you can set the desired value in the 34 a 42°C range, with 1°C accuracy. The thermostat guarantees maintaining stable water temperature, even when the installation has pressure jumps.

The mixers are made from top-grade brass. This material is extremely durable and corrosion-resistant, yet easy to form.

The black, matte surface of Deante Nero fittings is the result of the use of innovative technology. Its special properties mean that there are no

fingerprints on the tap. The surface structure is durable and easy to clean. To remove any dirt, just wipe the tap with a soft cloth. What's more, arranging the interior using a deep black fittings makes the colors surrounding it brighter, fuller and more expressive.

The ultra thin steel shower head provides a modern, glamorous look. Solid steel is resistant to moisture and corrosion, which ensures high quality and reliability of the product. Movable joint {allows for adjustment} gives you the ability to adjust the inclination of the rain shower, thanks to which you can adjust the setting of the head to your needs. As a result, you can enjoy a pleasant, relaxing shower for years to come.

The innovative Anti-Calc system extends the life of the product, guarantees reliability of operation and significantly facilitates cleaning. Limescale deposits accumulating at a water outlet is a completely normal thing, the result of which is decreased aesthetics after some time. To restore the original appearance, you usually need persistent scrubbing and special detergents. Thanks to Anti-Calc silicone nozzles, you can say goodbye to tedious cleaning. Limescale is very easy to remove during a daily bath or shower. Just wipe gently with a sponge or simply with your fingers, and the handset will look as new. Individual nozzles are replaceable, and in the set you will always find a few spare pieces. We recommend systematic removal of sediment from the nozzles.

Silicone tabs prevent limescale build-up and thus extend the durability and reliability of the shower head. Just wipe them with your finger and scale deposits disappear in the blink of an eye.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!
