

Shower mixer, thermostatic

Manufacturer	
Weight	1.77 kg
Product Code	BCH_N4BT
EAN	5907650815136
SKU	003072
IBB ID	13040

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5907650815136	Series	termostatyczne
Additional characteristics	cool-out	Acoustic group [dB]	II (20 < x ≤ 30)
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Flow class [l/min]	s - 15.1-19.8 l/min
Material	ZnAl	Mixer type	two-handle. thermostatic
Installation method	wall	Connection diameter	50
Temperature lock	Yes	Total height of the battery [mm]	96

The black, matte surface of Deante Nero fittings is the result of the use of innovative technology. Its special properties mean that there are no fingerprints on the tap. The surface structure is durable and easy to clean. To remove any dirt, just wipe the tap with a soft cloth. What's more, arranging the interior using a deep black fittings makes the colors surrounding it brighter, fuller and more expressive.

The thermostatic mixer ensures an easy and precise setting of a constant, pleasant water temperature. Using it is extremely simple. Just set the knob to the desired water temperature. A special lock protects against accidental setting of a temperature higher than a comfortable 38°C and, as a consequence, protects against burns. This solution will work especially where the youngest or seniors use the spray. It is therefore comfortable and safe.

The mixer has a 38°C lock, which prevents accidentally increasing temperature, providing a maximum comfortable use. In addition, in the Cascada model you can set the desired value in the 34 a 42°C range, with 1°C accuracy. The thermostat guarantees maintaining stable water temperature, even when the installation has pressure jumps.

Design can go hand in hand with comfort! The knobs of our thermostatic mixers combine beauty with ergonomics, allowing for comfortable and precise head control.

The mixers are made from top-grade brass. This material is extremely durable and corrosion-resistant, yet easy to form.

On the one hand, we have focused on advanced technology, economy and durability, while on the other hand, on good design. The faucets designed by Katarzyna Łogwinienko have a number of functions that enhance the comfort of bathing, making it an uninhibited relaxation.

Check valves prevent water from retreating to the installation. Additional strengthening even more effectively protects the cartridge and the entire tap from damage.
