

Shower column, with bathtub mixer, thermostatic

Manufacturer	
Weight	6.40 kg
Product Code	NAC_Z1HT
EAN	5907650815044
SKU	003076
IBB ID	13179

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5907650815044	Additional characteristics	cool-out
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Aerator	Yes	Ceramic cartridge size	35 mm
Adjustment range from [mm]	700	Connection thread	m8
Flow class [l/min]	a - 12-14.9 l/min	Material	stainless steel
Mixer type	single-lever. thermostatic	Spout type	foldable
Connection diameter	50	High adjust	YES

On the one hand, we have focused on advanced technology, economy and durability, while on the other hand, on good design. The faucets designed by Katarzyna Łogwinienko have a number of functions that enhance the comfort of bathing, making it an uninhibited relaxation.

Design can go hand in hand with comfort! The knobs of our thermostatic mixers combine beauty with ergonomics, allowing for comfortable and precise head control.

Check valves prevent water from retreating to the installation. Additional strengthening even more effectively protects the cartridge and the entire tap from damage.

The movable, folding spout also functions as a shower switch. To fill the bath, the spout must be positioned perpendicular to the mixer. The folding spout ensures safer bathing, which is particularly important for small children.

The silicone aerator allows for easy removal of lime sediment - simply wipe your finger across its silicone edges. The movable design allows you to change the angle of the water flow.

The mixer has a 38°C lock, which prevents accidentally increasing temperature, providing a maximum comfortable use. In addition, in the Cascada model you can set the desired value in the 34 a 42°C range, with 1°C accuracy. The thermostat guarantees maintaining stable water temperature, even when the installation has pressure jumps.

The mixers are made from top-grade brass. This material is extremely durable and corrosion-resistant, yet easy to form.

The ultra thin steel shower head provides a modern, glamorous look. Solid steel is resistant to moisture and corrosion, which ensures high

quality and reliability of the product. Movable joint {allows for adjustment} gives you the ability to adjust the inclination of the rain shower, thanks to which you can adjust the setting of the head to your needs. As a result, you can enjoy a pleasant, relaxing shower for years to come.

The innovative Anti-Calc system extends the life of the product, guarantees reliability of operation and significantly facilitates cleaning. Limescale deposits accumulating at a water outlet is a completely normal thing, the result of which is decreased aesthetics after some time. To restore the original appearance, you usually need persistent scrubbing and special detergents. Thanks to Anti-Calc silicone nozzles, you can say goodbye to tedious cleaning. Limescale is very easy to remove during a daily bath or shower. Just wipe gently with a sponge or simply with your fingers, and the handset will look as new. Individual nozzles are replaceable, and in the set you will always find a few spare pieces. We recommend systematic removal of sediment from the nozzles.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!
