

Toilet set, concealed, 6 in 1 Silia

Manufacturer	
Weight	41.44 kg
Product Code	CDLZ6ZPW
EAN	5907650819295
SKU	003100
IBB ID	13231

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5907650819295	Additional characteristics	cool-out
Frame height adjustment [mm]	200	Aerator size	M28
		Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Flow class [l/min]	z - 4-9 l/min
Material	ZnAl	Connection diameter	50

Easier and faster installation is ensured by the innovative tank with the new one-piece angle valve from Schell. Thanks to the openings in the frames, the mounting system can be easily attached to plasterboard structures, living quarters and wooden buildings. The filling valve is quiet, fast and extremely resistant to impurities in the water. New hinges for tanks with two-component insulation effectively protect against noise. The flush-mounted frame has an Easy Lock mounting kit for quicker and easier installation.

Ceramic products are characterized by special hardness and endurance. They have high color durability and do not absorb smells. The surface of ceramic products does not discolor and looks as new even after long use.

The antibacterial coating prevents the development of microorganisms and promotes hygiene. Thanks to this, we can avoid many infections. The antibacterial coating is also an ally in everyday cleaning.

Rimless bowls are designed in such a way as to promote easy cleaning, without the need for strong detergents and time-consuming scrubbing. The lack of a wrapped internal edge means that the difficult to remove dirt does not accumulate in the bowl. It is enough to wipe the comfortable, streamlined-shape bowl with a soft cloth and when rinsing the water stream easily flows around on its inner surface.

The biggest advantage of Deante toilet seats is the quiet and soft closing mechanism. Thanks to this, you prevent damage to sanitary ceramics, but also the seat itself.

The invisible mounting system makes all mounting elements hidden. This definitely improves the appearance of the entire bathroom. Lack of edges and protruding screws provides additional convenience when cleaning the fittings. This makes hygiene to be easier than ever before. Ceramics has a smooth surface and looks very elegant.

The attestation given by the National Research Institute - the National Institute of Public Health of PZH ensures that the products covered by it meet the highest hygiene requirements. They are safe for both health and the environment.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially

selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!
