The glass in the cabins has been covered with the innovative Active Cover hydrophobic coating, which repels water molecules from the glass surface and thus significantly reduces the formation of scale. The coating is applied during the production of glass, which guarantees its long durability and reliability.

The covers hide the unsightly assembly elements, adding elegance to the cabins.

Crystal clear, safety tempered glass with low iron oxide content. It gives a feeling of refinement and perfectly exposes the fittings inside the cabin.

The profile system makes it possible to level the curvature of the walls and helps to adjust the cabin to the place of installation.

Tempered glass has a harder surface and is more resistant to scratches, impacts and sudden temperature changes - in accordance with the European standard PN-EN. In addition, it is safe glass, (which is certified) by the Certificate from the Institute of Glass and Ceramics.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface

(metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!
