In the Alpinia series, the attention is drawn to the shapes with soft lines and the rounded body. The rounded shape makes the water flow freely from the perfectly smooth surface, and the products are easier to clean. Their simple, economical form will appeal to supporters of modern interiors, who appreciate functionality and refined details. Thanks to its small dimensions, Alpinia is an ideal solution for small rooms.

Silicone tabs prevent limescale build-up and thus extend the durability and reliability of the shower head. Just wipe them with your finger and scale deposits disappear in the blink of an eye.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially selected composition removes the most common dirt very effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!
