The set includes a slow-closing seat. Thanks to special cushioning stoppers, the seat goes down slowly and does not hit the bowl. Thus, it prevents damage and eliminates unnecessary noise. A set of a toilet with a seat makes you avoid the need to search for these elements separately and thus save valuable time.

The attestation given by the National Research Institute - the National Institute of Public Health of PZH ensures that the products covered by it meet the highest hygiene requirements. They are safe for both health and the environment.

Ceramic products are characterized by special hardness and endurance. They have high color durability and do not absorb smells. The surface of ceramic products does not discolor and looks as new even after long use.

The antibacterial coating prevents the development of microorganisms and promotes hygiene. Thanks to this, we can avoid many infections. The antibacterial coating is also an ally in everyday cleaning.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially

selected composition removes the most common dirt very effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!
