

Hand shower, 1-function Silia

Manufacturer	
Weight	0.25 kg
Product Code	NQS_F51S
EAN	5907650819073
SKU	003275
IBB ID	12940

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5907650819073	Series	silia
Additional characteristics	cool-out	Frame height adjustment [mm]	200
Aerator size	M28	Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Flow class [l/min]	s - 15-19.9 l/min
Material	stainless steel	Connection diameter	50

Silia mixers are a reinterpretation of one of the most classic models in the history of bathroom taps. The entire series is based on the shape of a pipe bent into arches, thanks to which the products are streamlined and rounded. Thanks to its simplicity and wide range of colors, the whole series is extremely refined. They can be used by fans of minimalist bathrooms as well as those in more expressive styles, such as Gentle Loft, Japandi or Art. Deco.

Silicone tabs prevent limescale build-up and thus extend the durability and reliability of the shower head. Just wipe them with your finger and scale deposits disappear in the blink of an eye.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!

The innovative design of the handset means that despite the flow of very hot water, the handset handle does not heat up. The internal element insulates heat, protecting against possible burns and increasing the convenience of use. Thanks to this, the product is completely safe.

The innovative Anti-Calc system extends the life of the product, guarantees reliability of operation and significantly facilitates cleaning. Limescale deposits accumulating at a water outlet is a completely normal thing, the result of which is decreased aesthetics after some time. To restore the original appearance, you usually need persistent scrubbing and special detergents. Thanks to Anti-Calc silicone nozzles, you can say goodbye to tedious cleaning. Limescale is very easy to remove during a daily bath or shower. Just wipe gently with a sponge or simply with your fingers, and the handset will look as new. Individual nozzles are replaceable, and in the set you will always find a few spare pieces. We recommend systematic removal of sediment from the nozzles.
