

Concealed shower set, with a shower head Silia

Manufacturer	
Weight	5.17 kg
Product Code	NQS_N9YK
EAN	5907650819189
SKU	003278
IBB ID	12943

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5907650819189	Additional characteristics	cool-out
Acoustic group [dB]	I (x ≤ 20)	Frame height adjustment [mm]	200
Aerator size	M28	Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Finish	nero
Flow class [l/min]	s - 15.1-19.8 l/min	Material	brass
Diameter [mm]	250	Installation method	flush-mounted
Spout type	still	Connection diameter	50
Connection type	for hose with hand shower holder	Shape	round

Silia mixers are a reinterpretation of one of the most classic models in the history of bathroom taps. The entire series is based on the shape of a pipe bent into arches, thanks to which the products are streamlined and rounded. Thanks to its simplicity and wide range of colors, the whole series is extremely refined. They can be used by fans of minimalist bathrooms as well as those in more expressive styles, such as Gentle Loft, Japandi or Art. Deco.

The shower set holder integrated with the body of the mixer brings the use of it to a whole new level. You do not have to drill additional holes in the wall, and the shower hand placed in the holder is stable and safe.

The black, matte surface of Deante Nero fittings is the result of the use of innovative technology. Its special properties mean that there are no fingerprints on the tap. The surface structure is durable and easy to clean. To remove any dirt, just wipe the tap with a soft cloth. What's more, arranging the interior using a deep black fittings makes the colors surrounding it brighter, fuller and more expressive.

The main advantages of concealed mounting are aesthetic appearance, ease of keeping the bathroom clean and hiding installation components, which are also not exposed to mechanical damage. Solutions of this type will also work in small bathrooms, where every centimeter counts. When installing a concealed system, only decorative wall-mounted elements remain visible, and the bathroom is functional, effective and fits in a fashionable minimalist style.

The rain shower has a movable hand shower holder, thanks to which we can adjust the angle of the shower head.

The innovative Anti-Calc system extends the life of the product, guarantees reliability of operation and significantly facilitates cleaning. Limescale deposits accumulating at a water outlet is a completely normal thing, the result of which is decreased aesthetics after some time. To restore the original appearance, you usually need persistent scrubbing and special detergents. Thanks to Anti-Calc silicone nozzles, you can say goodbye to tedious cleaning. Limescale is very easy to remove during a daily bath or shower. Just wipe gently with a sponge or simply with your fingers, and the handset will look as new. Individual nozzles are replaceable, and in the set you will always find a few spare pieces. We recommend systematic removal of sediment from the nozzles.

Silicone tabs prevent limescale build-up and thus extend the durability and reliability of the shower head. Just wipe them with your finger and scale deposits disappear in the blink of an eye.

Anti-Twist is a system that prevents the end of the shower hose from twisting during its use, which significantly affects the comfort of showering. Forget about the need to constantly undo it and losing time. What's more, the Anti-Twist system increases the durability and reliability of the product.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!

The innovative design of the handset means that despite the flow of very hot water, the handset handle does not heat up. The internal element insulates heat, protecting against possible burns and increasing the convenience of use. Thanks to this, the product is completely safe.
