The sink was equipped with modern "Space Saver" siphon. If you've been annoyed by pipes and elbows taking up most of the space in your cabinet, this is the solution for you. Telescopic and special design allows you to adjust position of the siphon to your needs. Thanks to this, it is easy to find much more space in the cabinet for example for homemade preserves or bins for waste segregation. You can also connect a dishwasher or washing machine to the siphon. And most importantly - you get the siphon in set!

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating another cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are mild for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus harmless for the environment. With Deante cleaning products, keeping things in order will be very easy!
