

# ANTI-ADHESION agent for wood textured moulds 5 l

Brand	ATLAS
Manufacturer	
Weight	5.00 kg
Product Code	AADS-05
EAN	5905400580747
SKU	003475
Application	Preventing from sticking to moulds, e.g. in the technology of making textured renders imitating wood
IBB ID	13333

## Product specification

Manufacturer	ATLAS	Unit	bottle
Brand	atlas	EAN	5905400580747
Relative air humidity during application and curing	< 80%	Density of the finished product	ca 1.9 g/cm3
		pH	8

## ANTI-ADHESION agent for mould for mineral render imitating natural wood texture 5 l

### Most important features

- easy and safe in use
- leaves no stains on the substrate
- makes work easier and prevents render from sticking to the mould

### Product description

ATLAS ANTI-ADHESION AGENT prevents mineral renders from adhering to silicone and polyurethane moulds, e.g. in the ATLAS CERMIT WN wood imitation textured render technology - effectively speeds up work and ensures that the desired pattern is achieved without problems.

### Main properties

- Safe to use - does not contain sulphur or aromatic compounds.
- It does not leave stains on textured substrates and is compatible with ATLAS BEJCA.
- Easy to apply - no special tools required, excellent working parameters.
- It makes working with silicone moulds easier - the agent does not degrade or deform the moulds.
- Biodegradable product.
- The product is available as a clear red liquid.
