

Bath mixer, freestanding, with shower set Arnika

Manufacturer	
Weight	5.80 kg
Product Code	BQA_D17M
EAN	5907650827696
SKU	003514
IBB ID	13356

Product specification

Manufacturer	DEANTE	Unit	pcs
EAN	5907650827696	Additional characteristics	adjustable angle of the shower head
Acoustic group [dB]	II (20 < x ≤ 30)	Frame height adjustment [mm]	200
Aerator size	m24	Aerator type	coin-slot
Ceramic cartridge size	35 mm	Adjustment range from [mm]	700
Connection thread	m8	Flow class [l/min]	s - 15.1-19.8 l/min
Material	brass	Mixer type	single-lever
Installation method	floor	Spout type	still
Connection diameter	50		

Backflow valves guarantee the correct operation of the fittings, and in thermostatic taps they also prevent water mixing in the pipes.

"Coin Slot" Aerator can be unscrewed even with a coin. This is very useful when we want to clean it or replace it with a new one.

Discreet and at the same time a very ergonomic function switch that allows you to change the flow of the water stream even at low pressure.

Anti-Twist is a system that prevents the end of the shower hose from twisting during its use, which significantly affects the comfort of showering. Forget about the need to constantly undo it and losing time. What's more, the Anti-Twist system increases the durability and reliability of the product.

The innovative Anti-Calc system extends the life of the product, guarantees reliability of operation and significantly facilitates cleaning. Limescale deposits accumulating at a water outlet is a completely normal thing, the result of which is decreased aesthetics after some time. To restore the original appearance, you usually need persistent scrubbing and special detergents. Thanks to Anti-Calc silicone nozzles, you can say goodbye to tedious cleaning. Limescale is very easy to remove during a daily bath or shower. Just wipe gently with a sponge or simply with your fingers, and the handset will look as new. Individual nozzles are replaceable, and in the set you will always find a few spare pieces. We recommend systematic removal of sediment from the nozzles.

Delicate, minimalist, and above all beautiful and intriguing - this is the Arnika line, inspired by the Danish hygge style. The Arnika series combines functionality and inspiration with gentle shapes found in nature.
