The graphite-steel surface of Deante Titanium fittings is the result of the use of innovative technology. It is a spectacular compromise between gray, dark graphite, black and even a delicate shade of brown - the perfect decoration of any interior arrangement. The surface structure is durable, easy to clean and is not susceptible to fingerprints.

The use of dedicated agents means that the surfaces do not deteriorate and remain smooth for long, facilitating daily cleaning. A specially selected composition removes the most common dirt extremely effectively. On the other hand, the preparations are delicate for a given type of surface (metal, granite, ceramics and others), without entering into chemical reactions with them. The preparations are biodegradable and thus safe for the environment. With Deante cleaning products, keeping things in order will be very easy!
