Advice IBB	
Application	Screeding floors and general fill, bedding for paving
IBB ID	13518

### Product specification

Manufacturer	DAY-AGGREGATES	Unit	plastic bag
Norm	BS EN 12620		

#### Sharp washed sand 0-4mm 25kg

Sharp sand used for screeding generally favours a supply from a marine source

Land-based sources can cause problems when being pumped as any contamination, mainly large pieces, will or could cause a blockage within the actual pump

Sometimes referred to as Thames washed, coarse sharp, grit sand, screeding sand or concreting sand
