Weight	20.00 kg
EAN	5903672755153
SKU	003690
Advice IBB	
Application	for spraying thin-layer facade renders, mesh glue, plasters and paints
IBB ID	13547

Product specification

Manufacturer	AGREKOM	Unit	set
EAN	5903672755153	Dimension	20x70cm
Country of manufacture	Poland	Capacity	32kg masy
For use	semi-professional	Material of exhaust	stainless steel
Diameter of filler hole	9.8cm	Hose length	5m
Reach of passing material - max	15m	Tank capacity [L]	20
		Dimensions of the tank with wheels	20x70cm
Possibility to block wheels	YES	Diameter of wheels	17cm
Maximum working pressure	8		

Plastering unit for semi-professional use 20 litres

THE SET INCLUDES

- 20 l tank with bottom outlet and black safety flange,
- semi-professional plastering gun (4, 6, 8 mm nozzles included),
- semi-professional emulsion gun,
- double metal pressure regulator,

- Technical hoses in lengths of 5 or 10 metres (customer's choice). The 10 and 15 metre-long technical hoses are sold in two sections. On request, the hose can be in one piece.
- specially reinforced hopper chassis with large wheels for easy transport

DESCRIPTION

Plastering unit based on a new innovative stainless steel tank.

The 20-litre tank (holds approx. 30 kg of weight) is mounted on a sturdy chassis with 2 steering wheels. The wheels are lockable, which secures the unit during operation. The unit can operate at a working pressure of 8 BAR, allowing it to work on hoses as long as 15 metres. The unit's tank has a conical bottom, which speeds up and facilitates the flow of material.

The plastering machine is equipped with two spray guns for semi-professional use. The guns guarantee efficient work even with very demanding materials.

The plastering gun gives you the possibility to spray-apply granular façade plaster, mesh adhesive, gypsum plaster and putty.

The paint gun is a very good solution when spraying emulsion and primer paints.

The kit also includes hoses that allow you to work at a distance of 5 metres from the tank.

APPLICATION

A plastering unit ideal for spraying:

- Façade plasters
- Wall spritzing
- Glue on mesh for thermal insulation work
- gypsum plastering with a round jet
- Spray painting
- Priming (also quartz primer)
- Spray wallpaper
- Fire protection
