

# Industrial plastering and rendering machine Agrekom AK10 PRO GOLD 60L

Manufacturer	
Country of manufacture	<b>Poland</b>
Dimension	<b>36x80cm</b>
Weight	<b>50.00 kg</b>
EAN	<b>5903672755191</b>
SKU	<b>003691</b>
Advice IBB	
Application	<b>for spraying thin-layer facade renders, mesh glue, thick plasters and paints</b>
IBB ID	<b>13548</b>

## Product specification

Manufacturer	<b>AGREKOM</b>	Unit	<b>set</b>
EAN	<b>5903672755191</b>	Dimension	<b>36x80cm</b>
Country of manufacture	<b>Poland</b>	Capacity	<b>90-120kg masy</b>
For use	<b>industrial</b>	Material of exhaust	<b>stainless steel</b>
Diameter of filler hole	<b>21cm</b>	Hose length	<b>5m</b>
Reach of passing material - max	<b>15m</b>	Tank capacity [L]	<b>60</b>
		Dimensions of the tank with wheels	<b>36x80cm</b>
Possibility to block wheels	<b>YES</b>	Diameter of wheels	<b>19cm</b>
Maximum working pressure	<b>8</b>		

Industrial plastering set Agrekom AK10 PRO GOLD - 60 litres

### The set contains:

60 L tank  
 AK10 PRO plaster spray gun for industrial use,  
 set of nozzles 4, 6, 8, 10, 12 mm for the plastering gun,  
 AIR PRO 4, 6, 8 mm nozzle set for plastering gun,

industrial spray gun,

double metal pressure regulator,

Technical hoses in lengths of 5, 10 or 15 metres (customer's choice). The 10 and 15 metre-long technical hoses are sold in two sections. On request, the hose can be in one piece.

**Description:**

A plastering unit suitable for spraying thick plasters and paints. The set includes professional guns for perfect coverage of the wall with structural plaster, gypsum plaster or emulsion paint.

The set includes the innovative AK10 PRO plaster gun, which allows dense plaster compounds to be sprayed with maximum efficiency. The fine-tuned air delivery system of the gun ensures perfect dispersion of the plaster grain and an even spray. AIR PRO nozzles allow dense materials to be sprayed without dilution.

The gun has a function of blocking the outflowing material and air with the trigger. This eliminates the risk of unwanted thickening (blobs) on the wall.

The set also includes a paint gun for high-intensity work. The hoses included in the set are tailored to transport dense emulsion paints.

Both the paint gun and the plaster gun have infinitely adjustable spray patterns.

The whole set has been designed on the basis of a 60-litre tank, which allows as much as 120 kg of compound to be easily transported. The tank allows for an operating pressure of 8 BAR. Its conical bottom allows the material to flow easily into the lower outlet.

**Application:**

Spray application of structural plasters (facade plasters like sand textured, mineral, silicone, silicate, and acrylic plasters)

Spraying of gypsum plaster finish (flat stream)

Wall spackling (rendering)

Spraying glue onto mesh when insulating

Spray painting (also with dense emulsions)

Priming walls

Applying liquid wallpaper

Spraying of fire retardants

Impregnation
