Product specification

Manufacturer	LIKOV	Unit	pcs
EAN	8595244836444		

PVC-u Bell Cast/Renderstop Beads for plaster are designed to deliver a gentle gradient at the base of the render, it is used above doors, windows and at DPC level to allow rainwater to drain clear of the underlying substrate.

Features and benefits:

- shape of profile enabling plaster ending with drip
- additional edge for prevention of water capillary rise
- minimisation of time needed for perfect detail creation
- protection of the vulnerable spot at plaster ending
- for all types of plasters including gypsum-based
- long-term stability, without corrosion risk
