Moisture plasterboard TE 2400 x 1200 x 12.5 mm

The Moisture Resistant Gypsum Board is a type of gypsum board that offers several advantages for various applications. Here are the characteristics of this board:

- Feature:** The board is paper-faced, which provides additional protection and durability.
 - Thickness:** The thickness of the board ranges from 12.50mm to 15mm, ensuring strength and stability.
 - Width:** The board has a width of 1200mm, making it suitable for different construction projects.
 - Length:** The length of the board varies from 2000mm to 3600mm, providing flexibility for installation.
 - Edge:** The board is available with either a tapered or square edge, allowing for seamless connections between boards.
 - Raw Material:** The board is made from high purity gypsum powder, ensuring quality and performance.
 - Application:** The Moisture Resistant Gypsum Board is commonly used for partition walls, cladding, and suspended ceilings due to its resistance to water, humidity, and vapor.
- Advantages of the Moisture Resistant Gypsum Board include its resistance to water, humidity, and vapor. It is effective against water leaks and is ideal for wet rooms where moisture protection is crucial.
