Product specification

Manufacturer	Torggler	Unit	pcs
EAN	5908313290154		

An agent for accelerating the setting and drying of dispersion paints and plasters.

EKOR 69 is a ready-to-use, liquid agent intended to accelerate the setting and drying of products based on acrylic, siloxane and silicone dispersions. It enables plastering and painting works to be carried out at reduced substrate and ambient temperatures, also at increased air humidity. The agent should be used when the substrate and air temperature is between +1oC and +10oC, and the air humidity should not be higher than 80%.
