Plastering spray gun industrial AK10 Gold

DESCRIPTION

The AK10 PRO plastering gun is designed for high-intensity work. The gun is characterised by incredibly high spraying efficiency and excellent dispersion of the plaster grain.

The possibility to block the spray by releasing the trigger and the body ideally adapted to the hand allow maximum comfort.

The new air supply and the innovative AIR PRO nozzle type ensure that dense masses can be sprayed without dilution.

AIR PRO nozzles facilitate perfect distribution of the compound on the plastered surface, giving structural façade plasters an even grain distribution and a new improved appearance.

The included additional nozzles with different diameters allow even easier adjustment to the material to be sprayed.

APPLICATION

- Spray application of structural plasters (facade plasters like sand textured, mineral, silicone, silicate, and acrylic plasters)
- Spraying of gypsum plaster finish (flat stream)
- Wall spackling (rendering)
- Spraying glue onto mesh when insulating
- Spray painting (also with dense emulsions)

- Priming walls
- Applying liquid wallpaper
- Spraying of fire retardants
- Impregnation

THE SET INCLUDES:

- AK10 PRO plaster spray gun for industrial use,
- set of nozzles 4, 6, 8, 10, 12 mm for the plastering gun,
- AIR PRO 4, 6, 8 mm nozzle set for plastering gun,
- 2.5mm needle
