

Air compressor 3.0 KW V-Twin Torpeda 50L

Manufacturer	
Weight	50.00 kg
EAN	5903672752374
SKU	003731
Advice IBB	
Application	The device is suitable for continuous operation
IBB ID	13588

Product specification

Manufacturer	AGREKOM	Unit	pcs
EAN	5903672752374	Compressor motor winding	copper
Compressor pressure	10 bar	Compressor size	50l
Praca ciągła	Yes	Engine power	3.0 kw
Maximum operating temperature	100 °	Rotation speed	2850 obr./min
		Theoretical efficiency	530 l/min
Voltage	230v/50hz		

Air compressor 3.0 KW V-Twin Torpeda 50L

DESCRIPTION

The Torpeda compressor with a 3kW induction motor has been equipped with 2 pistons in V-mode and a 50 litre cylinder. The compressor has been manufactured from the highest quality components.

The unit is suitable for continuous operation.

It is the perfect solution when powering pneumatic plastering and painting units.

The compressor is equipped with a system of automatic air release from the pistons when they reach 10 BAR. This makes restarting even easier.

The compressor generates an operating pressure of 10 BAR and restarts at 8 BAR when the pressure drops.

All-copper motor winding, enlarged crankshaft, workable cylinder size, metal housing for pressure gauges and air filters - this is what sets the Torpeda compressor apart.

IDEAL FOR

- Supply of pneumatic plastering units,
- Blowing, pumping and other work requiring compressed air,
- Power supply for pneumatic equipment
